Name _____

Nikola Tesla: The Man Who Electrified the World

Open-Ended Response Answer Key

1. Some of Tesla's ideas, like wireless electricity, were too advanced for his time because the technology and funding were not available.
2. Tesla might invent new ways to store energy, improve wireless technology, or create even smarter robots.
3. Without Tesla, we might not have the same electricity systems, radios, or wireless technology.
4. (Student's choice, example: "I would invent a robot that helps clean the ocean to save sea animals.")
