Name _____

Ada Lovelace: The First Computer Programmer

Open-Ended Response Answer Key

1. (Example: "She worked very hard, had great ideas, and did not let others' opinions stop her from learning and creating.")
2. (Example: "She might have helped build one of the first real computers or created more advanced programs.")
3. (Example: "Computers help us with school, work, entertainment, and communication. They allow us to research, play games, and connect with people worldwide.")
4. (Example: "It is important to remember pioneers like Ada Lovelace so that we can learn from them and be inspired to make new discoveries.")
