

Name _____

Hidden Animals

In a quiet forest, a moose silently walked along a narrow trail. The animal had a lovely coat and long, graceful legs.

A friendly lamb peeked out from behind a fallen log, watching the moose. Nearby, a calm salmon swam upstream, searching for food. The forest was filled with peaceful sounds, including the subtle rustle of leaves.

Overhead, a small wren glided smoothly through the air. In the distance, an eagle landed on a tall, crooked branch. Beneath the eagle, a family of wolves howled softly to each other. They were careful to keep their movements gentle and quiet.
