

Name _____ **Back Slash**

Back Slash

The back slash, commonly confused with the forward slash, is a character used in computer programming languages. It is located on the righthand side of a computer keyboard above the Enter key. It can be used to add formatting during webpage creation, for writing source code, and for creating command-line scripts. The backslash is also used on mathematics. It is not used in writing.

Trace the backslash.

1. What is the back slash?

2. Where is the backslash used?

3. Where on the computer keyboard is the backslash located?

4. Where is the backslash NOT used?
