## The Trampoline Trouble

In the friendly neighborhood of Tranquil Terrace, there was a popular park where children loved to play. The park had swings, slides, and the most exciting attraction of all—a giant trampoline. The trampoline was everyone's favorite spot, where kids could jump, flip, and bounce to their heart's content.

One bright and sunny Saturday, a group of friends decided to spend the day at the park. The group included Trent, a tall and athletic boy; Trina, a cheerful and energetic girl; and their little brother, Trevor, who was always full of curiosity. They packed a picnic and set off for a day of fun.

When they arrived at the park, they noticed something troubling. The trampoline was tilted to one side, and its surface was torn. The kids were disappointed, but Trent quickly came up with an idea. "Let's fix the trampoline ourselves!" he suggested. Trina and Trevor agreed enthusiastically.

Trent, Trina, and Trevor started by inspecting the trampoline to find out what was wrong. They noticed that one of the springs was broken and the fabric had a big tear. Trent said, "I'll take care of the spring. Trina, you can sew the fabric, and Trevor, you can help us find the tools we need."

The trio got to work. Trent found a replacement spring in their garage, Trina borrowed a sewing kit from their neighbor, and Trevor gathered the tools. They worked together, carefully replacing the spring and sewing the fabric. After a few hours, the trampoline looked as good as new.

When they finished, the other children in the park cheered and thanked them. Everyone lined up to take turns bouncing on the trampoline, and the day was filled with laughter and joy.

To celebrate their success, Trent, Trina, and Trevor shared their picnic with their friends. They enjoyed sandwiches, fruit, and treats under the shady trees, feeling proud of their teamwork and problem-solving skills.

From that day on, Trent, Trina, and Trevor were known as the heroes of Tranquil Terrace, always ready to help and fix any problem that came their way.
