

Name _____

Space Bang Adventure

In space, the spaceship made a loud bang as it landed on the moon. The clang of the metal echoed across the surface.

An astronaut sprang out, excited to explore. He sang a cheerful tune while hopping around. Nearby, a robot's arm swung, collecting moon rocks. The astronaut's suit had a special fang that could dig into the ground.

As they explored, the stars above seemed to hang closer. They even found a strange plant that gave off a pleasant tang. The adventure continued until the spaceship's alarm rang, signaling it was time to return.
