

Name _____

Dino Explorers

Max loved dinosaurs and wanted to be a paleontologist. One day, his mentor, Dr. Taylor, took him to a dig site.

Max used a special detector to find hidden fossils.

As he dug deeper, he discovered the jawbone of a raptor. Dr. Taylor was impressed with Max's discovery.

They found more bones, including a huge femur. Max imagined the dinosaur roaring in the forest long ago.

The bones were carefully transported to the museum.

Max felt proud to contribute to the dinosaur exhibit.

Visitors admired the skeleton, and Max dreamed of finding more.
