

Name _____

Spaceship Adventure

In a far-off galaxy, a young astronaut named Leo swung open the spaceship door. He flung himself into his seat, ready for takeoff. The countdown begun, and soon the spaceship sprung to life. As they traveled through space, Leo sung a cheerful song about the stars. Suddenly, the ship's alarm clung loudly, signaling a problem.

Leo's friend, Zoe, sprung into action, checking the control panels. "We've sprung a leak!" she shouted. They hung in space, looking for a solution. Using a long piece of tubing, Leo bung the leak, and the problem was fixed. They both sung with relief as they continued their journey, exploring the wonders of space.
