- Jaguar - A powerful and stealthy big cat, jaguars are apex predators found in the rainforests of the Americas.
- Toucan - Recognized for its large, colorful bill, the toucan is a striking bird that thrives in the canopies of tropical rainforests.
- Anaconda - One of the largest snake species in the world, the anaconda is a nonvenomous constrictor native to South America's rainforests.
- Macaw - Known for their vibrant plumage and intelligence, macaws are large, social parrots that inhabit tropical rainforests.
- Capybara - The largest rodent in the world, capybaras are semi-aquatic mammals that live near rivers and wetlands in rainforest areas.
- Sloth - A slow-moving mammal with a unique upside-down lifestyle, sloths are tree-dwellers known for their leisurely pace.
- Caiman - Small crocodilian reptiles, caimans inhabit rainforest waterways and are skilled predators.
- Piranha - Famous for their sharp teeth and strong bite, piranhas are carnivorous fish often found in the Amazon River.
- Tarantula - Large and hairy spiders, tarantulas are ground-dwelling predators that often live in the humid underbrush of rainforests.
- Okapi - A rare and elusive relative of the giraffe, the okapi has zebra-like stripes and inhabits the dense rainforests of Central Africa.
