Mammal - A warm-blooded animal that feeds its young with milk and usually has hair.

Rodent - A small animal with front teeth that keep growing and need constant chewing to keep them short.

Fur - The thick layer of soft hair that keeps the animal warm and protected.

Teeth - Structures in the mouth used for biting, chewing, and eating plants.

Claws - Sharp, curved tips at the end of limbs used for digging, climbing, and handling things.

Digging - The action of moving soil to make shelters, find food, or create living spaces underground.

Sleep - Long periods of rest where the animal saves energy and undergoes important body processes.

Tail - A long part at the back of the body that helps with balance and communication.

Paws - Soft, padded ends of limbs with toes, used for walking and handling objects.

Herbivore - An animal that mainly eats plants like leaves, stems, and roots.
