

Name _____

The Magical Day of May and Jay

May and Jay were two best friends who lived in a colorful village. One sunny day, they decided to go on a magical adventure. They packed a picnic and set off to play by the big, sparkling bay.

On their way, they found a trail of shiny stones. "Let's follow this trail," said May. Jay agreed, and they walked along the stones until they reached a hidden glade. In the glade, they saw a fairy named Fay. Fay had wings that sparkled like the sun's rays.

"Welcome, May and Jay," said Fay. "Would you like to see a special display?" The friends nodded excitedly. Fay waved her wand, and suddenly, the sky was filled with colorful balloons, and a parade of animals began to play music.

May and Jay danced and played all day with Fay and the animals. When the sun began to set, Fay gave them each a flower made of clay to remember their magical day. They thanked Fay and made their way back home, dreaming of their next adventure.
