

Name \_\_\_\_\_ **Angle Brackets**

# Angle Brackets

Angle brackets (< and >) are punctuation marks that come in pairs. Used infrequently in writing, their main functions are below. Write your own example of each function.

*In some languages, angle brackets perform the same function as quotation marks do in English.*

---

---

*To indicate asides.*

---

---

*To indicate speech in a foreign language.*

---

---

*To mention a website.*
