

Name _____ **Rhetorical Devices**

Repetition

Repetition is saying the same thing more than once. Speakers will often repeat a word or a phrase on purpose in order to emphasis, to stress important thoughts or points, or to create an emotional response in their audience.

Find an example of repetition in the assigned text. Write it below.

Is it a specific kind of repetition? What kind is it? How do you know?

Why do you think the writer or speaker used repetition here?
