

Name _____

Secret Space Mission

In a distant galaxy, Captain Lance prepared for a secret space mission. He packed a special muscle-enhancing suit for the journey.

Lance's spaceship, named "Silent Star," was ready for takeoff. He checked the intricate control panel one last time before launch. His co-pilot, a robot named Arctic, assisted him. They navigated through the cosmic dust with precision.

Suddenly, Lance spotted an ancient spacecraft floating silently in space. Using a delicate touch, they docked with the mysterious vessel. Inside, they found a priceless relic from a lost civilization. Excited about their discovery, they returned to Earth as heroes.
