

Evaluating Arguments

TRUE OR FALSE

1. An argument is a statement that is backed up with objective evidence.

2. The only requirement for an argument is that it take a position or point of view on a subject.

3. Only overarching arguments, not contributing arguments, need to be supported with evidence.

4. It is acceptable to support an argument with subjective evidence.

5. A statement of fact can be an argument.

6. A statement of fact can be evidence to support an argument.

7. Argument and assertion mean exactly the same thing.

8. Thesis is another word for an overarching argument.

9. A statement of fact does not have a point of view.
