

Name _____

Match the Set

Match the flip flops to each of the shirts.

The image contains a matching exercise within a yellow rounded rectangle. On the left side, there are five pairs of flip flops, each pair in a different color: light blue, red, green, dark blue, and purple. On the right side, there are five shirts, each with a different color and a yellow flower pattern. The shirts have collars in various colors: purple, blue, red, blue, and green. The task is to match each pair of flip flops to the shirt that has the same color as the flip flops.
