

Name _____

Science Camp

At the annual Science Camp, kids from all over the country came to explore and learn. The camp's resident physicist set up a station to

teach about the principles of motion with a giant pendulum. A young chemist showed everyone how to make their own slime using safe ingredients.

The biologist led a nature hike, pointing out different species of plants and insects along the way. An artist organized a workshop where campers could draw their favorite animals in the wild. The geologist brought samples of different rocks and explained how they were formed.

An enthusiastic meteorologist gave a talk about how weather patterns are predicted. The camp's humorist entertained everyone with science-related jokes and funny stories. A skilled guitarist played songs around the campfire, making the evenings enjoyable.

The camp journalist wrote daily updates for the camp newsletter, keeping everyone informed about the activities. An ecologist emphasized the importance of conserving nature and protecting wildlife.

Each day was filled with fun and learning, making the Science Camp a memorable experience for everyone.
