

Name _____

Forest Explorer

Tina loved being an explorer in the forest. She used a compass and a map as her navigator. One day, she found a hidden door covered in ivy.

The door led to a secret laboratory filled with ancient artifacts. An old mentor named Professor Moore greeted her. He was a collector of rare plants and flowers. Professor Moore showed Tina a special mirror that could reflect hidden paths.

Tina was thrilled to discover a new corridor. This corridor had a sensor that lit up when someone walked through. Tina knew this adventure would be one she would remember forever.
