

Name _____

Plastic-Free Paradise

Meet Emily, a young girl living in a world unlike any other. She resided in a utopian society known as "EcoTopia," where all plastics were banned to protect the environment. In EcoTopia, people embraced eco-friendly alternatives and sustainable living practices.

Emily began her day by stepping outside into the clean, fresh air. The streets were lined with vibrant gardens, and solar-powered vehicles silently glided along the roads. Emily marveled at the absence of plastic litter that used to clutter the sidewalks in her old world.

As she walked to the local market, Emily noticed that all the products were packaged in biodegradable materials or reusable containers. The market buzzed with activity, and the food section showcased an abundance of fresh fruits and vegetables without plastic packaging.

At school, Emily and her classmates learned about the harmful effects of plastic pollution on the planet. They were taught how to reduce waste, recycle, and compost. The school even had a special garden where they grew their own produce.

One day, Emily and her friends decided to embark on a hike through the lush EcoTopian forests. Along the way, they encountered friendly wildlife and discovered pristine streams, free from plastic pollution. They marveled at the beauty of nature, untouched by the presence of plastic.

Emily's journey in EcoTopia was filled with joyful experiences, like picnicking in plastic-free parks and swimming in crystal-clear lakes. She cherished the close-knit community and the collective commitment to protect their eco-friendly paradise.

As Emily grew older, she became an advocate for the environment, spreading the values of EcoTopia to neighboring regions. She believed that every corner of the world could become a plastic-free paradise, just like EcoTopia.
