

Name _____

Space Explorers

Samantha wanted to be an explorer. She dreamed of visiting every planet and even some stars. One day, she met Dr. Mentor, a famous scientist. He had an idea for a new type of

rocket. The inventor shared his plans with Samantha.

Together, they worked hard in the laboratory. After many trials, their creation was ready. The rocket had a special detector to find new planets. Samantha and Dr. Mentor became partners on this exciting journey.

They flew past the asteroid belt and into unknown regions. Their first discovery was a small, colorful moon orbiting a giant planet. The journey was a great success, and they became heroes.
