Burrow - An underground home made by an animal for safety.

Hibernate - A long period of sleep animals enter to save energy during cold weather.

Wake - When the animal comes out of sleep to do daily activities.

Shadow - A sign used to see how the animal behaves based on the environment.

Sleep - A long rest period the groundhog takes to stay healthy and energized.

Digging - The act of moving earth to make homes or find food.

Forage - Looking for and collecting food from the area.

Sniff - Using the nose to smell scents in the habitat.

Tunnel - An underground passage built to connect different parts of the home.

Emergence - Coming out from a hidden place to interact with the environment.
