

Name _____

RoboEgg: The Easter Egg Hunt Assistant

Meet Alex, a creative and determined kid who loved Easter egg hunts more than anything in the world. Every year, Alex looked forward to scouring the backyard for hidden eggs filled with chocolates, toys, and surprises. But this year, Alex had a brilliant idea to make the Easter egg hunt even more exciting.

Alex decided to build a robot to help with the Easter egg hunt. The robot would have a basket to collect the eggs, a camera to scan for hidden eggs, and a special Easter egg radar. Alex named the robot "RoboEgg."

For weeks, Alex worked tirelessly in the garage, using spare parts, old toys, and a bit of ingenuity to bring RoboEgg to life. It wasn't easy, but Alex was determined to make the Easter egg hunt unforgettable.

On Easter morning, Alex unveiled RoboEgg to the family. With its shiny metal body and colorful Easter-themed decorations, RoboEgg looked like a friendly Easter bunny robot. The family was amazed and excited to see how RoboEgg would perform.

As the Easter egg hunt began, RoboEgg sprang into action. Its Easter egg radar scanned the yard, and with a beep, it detected hidden eggs. RoboEgg's basket opened, revealing a mechanical arm that extended to pick up the eggs. With precision, it collected eggs and placed them gently in its basket. The kids cheered as RoboEgg found eggs hidden in the trickiest spots.

Not only did RoboEgg help find eggs, but it also added an element of surprise. It had a mini projector that displayed clues and riddles for the kids to solve, leading them to hidden treasures. The Easter egg hunt became an adventure filled with excitement and laughter.

When all the eggs were found, RoboEgg presented a grand prize to the kid who found the most eggs—a golden egg filled with a special surprise. The kids were thrilled, and Alex beamed with pride.

The Easter egg hunt that year was the most memorable one yet, thanks to RoboEgg. Alex's invention brought a new level of fun and excitement to the tradition, and the family couldn't wait for the next Easter adventure with their trusty RoboEgg.
