## Ron's Journey

### Open-Ended Response Answer Key

1. Students should share a personal experience of feeling overlooked or compared to someone else and how they handled it.
2. Many students may say yes because Ron experiences doubts like real people do, making him more relatable. Others may say no if they think his struggles are unique to his magical world.
3. Some may argue that natural talent is most important, while others may believe that hard work and determination (like Ron's) matter more.
4. Students should give thoughtful advice to Ron about believing in himself, appreciating his own strengths, and not comparing himself to others.
