## RoboGuardians of the Earth

### Short Answer Key

1. The RoboGuardians were collecting plastic waste and debris from the polluted ocean when the children saw them.
2. The RoboGuardians specialized in reforestation by planting saplings and nurturing them with the perfect amount of water and nutrients. This transformed the once barren land into a lush, green paradise.
3. The flying RoboGuardians monitored air quality and released purifying agents into the atmosphere, removing harmful pollutants. They contributed to environmental improvement by ensuring clean air for all.
4. Answers may vary but could include ideas about becoming more environmentally conscious, reducing plastic waste, supporting reforestation efforts, or advocating for cleaner air and water in their communities.
5. The use of technology by the RoboGuardians benefited Earth by efficiently cleaning polluted areas, reforesting deforested lands, and purifying the atmosphere, thereby restoring the planet's ecosystems and teaching humans the importance of environmental stewardship.
