Name _____ Estimation Word Problems

1. Sarah is organizing a lemonade stand. She estimates that she can sell about 20 cups of lemonade per hour. If she plans to keep the stand open for 3 hours, how many cups of lemonade should she estimate selling?
2. The school cafeteria serves about 200 slices of pizza every day. If there are 5 days in a school week, how many slices of pizza should the cafeteria estimate serving in a week?
3. Timmy wants to estimate how many marbles are in a jar at the school fair. If he sees that the jar is about half full and estimates the jar can hold around 200 marbles when full, how many marbles should he estimate are in the jar?
4. The local library estimates that each week, about 30 children borrow books from the children's section. If there are 4 weeks in a month, how many children should the library estimate borrow books in a month?
5. The town park has around 50 benches for people to sit on. If each bench can seat about 3 people comfortably, how many people should the park estimate can sit on the benches at one time?
6. Emma wants to estimate how many candies are in a jar for a contest. She observes that the jar is about three-quarters full and estimates it can hold around 300 candies when full. How many candies should she estimate are in the jar?
7. The local grocery store estimates that they sell about 100 cartons of milk each day. If there are 7 days in a week, how many cartons of milk should the store estimate selling in a week?
8. Michael is going on a road trip and wants to estimate how many miles he will drive. If he plans to drive for 5 hours each day and estimates his average speed to be around 60 miles per hour, how many miles should he estimate driving in total?
9. The school playground has around 150 students playing during recess. If each student wants to play on the swings and there are 4 swings available, how many students should the playground estimate can play on the swings at one time?
10. The local bakery estimates that they sell about 80 donuts each morning. If they are open for 6 mornings in a week, how many donuts should the bakery estimate selling in a week?
