Addition Word Problems

## Answer Key

1.  $18 \times 25 = 450$  milliliters of the solution will be used in total.
2.  $4 + 3 + 2 = 9$  goals were scored in total.
3.  $85 \times 10 \times 12 = 10,200$  cookies were sold in total.
4.  $5 \times 7 \times 45 = 1575$  minutes of live music will be offered in total.
5.  $20 \times 15 + 35 \times 10 = \$700$  is the total revenue from selling all the novels.
6.  $120 + 85 + 40 = 245$  cubic meters of concrete is required in total.
7.  $25 \times 20,000 + 15 \times 30,000 + 10 \times 35,000 = \$1,150,000$  is the total revenue from vehicle sales.
8.  $6 \times 12 \times 5 = 360$  points are available in total throughout the competition.
9.  $8 \times 90 + 12 \times 30 + 15 \times (8+12) = 1320$  minutes is the total runtime of the festival.
10.  $60 \times 8 - 60 \times 2 = 240$  slices will be left over after every student has had their share.
