## The Easter Bunny's Egg-citing Mishaps

### Open-Ended Response Answer Key

1. The Easter Bunny's journey was full of mishaps. Two of the mishaps were when it tumbled down a grassy hill and when it got its paws mixed up and placed the wrong colored eggs in the wrong baskets.
2. The Easter Bunny's fur turning muddy was a problem because it made the Bunny look like a chocolate bunny, and it also left muddy pawprints on the eggs, making them less appealing.
3. The Easter Bunny had to chase the squirrel through gardens and across fences to retrieve the eggs.
4. One possible way the Easter Bunny could have avoided mishaps is by being more careful and taking its time instead of rushing to deliver the eggs.
