

Name _____

Dr. Drake's Dreamy Dragon Droplets

In a magical town called Dreamville, there was a brilliant inventor named Dr. Drake. Dr. Drake was famous for his incredible inventions, but his most marvelous creation was his Dreamy Dragon Droplets.

These droplets were tiny, sparkling beads that, when dropped into water, would transform into miniature dragons! Each dragon had a unique color and could perform amazing tricks. Dr. Drake loved to demonstrate his Dreamy Dragon Droplets to the townspeople.

One day, as Dr. Drake was preparing for a grand display, his trusty assistant, Dree the dragon, accidentally dropped a whole jar of the droplets into the town's drinking water supply. The water in Dreamville turned into a colorful, bubbly fountain, and tiny dragons started popping up everywhere!

At first, the townspeople were shocked and didn't know what to do. But soon, they realized the dragons were friendly and loved to play. Children laughed as the dragons performed tricks, and adults were delighted by the colorful display.

Dr. Drake quickly devised a plan. He instructed everyone to bring their dragons to the town square. There, he used his special Dream Drainer, a device that could safely collect all the dragons back into droplets. It took a while, but soon all the dragons were back in their droplet form, and Dreamville returned to normal.

The townspeople were so impressed by Dr. Drake's invention and his quick thinking that they decided to hold an annual festival in his honor. Every year, they would drop a few Dreamy Dragon Droplets into the town fountain and watch the magical dragons perform.

Dreamville became famous for its annual festival, and people from all over the world came to see the dreamy dragons. Dr. Drake continued to invent wonderful things, always making sure to keep a close eye on his mischievous assistant, Dree.
