### Butterfly Business

On a bright and sunny morning, the students in Mrs. Green's class were excitedly preparing for a unique adventure. Today, they were going to a butterfly sanctuary to see the beautiful insects fluttering around. The children were buzzing with excitement, imagining the colorful wings they would see.

Upon arriving at the sanctuary, the students immediately noticed butterflies of every color flying and resting on flowers. They spent time learning about the different types of butterflies and their life cycles, starting from a tiny egg to a crawling caterpillar, and finally to a flying butterfly.

In the middle of the visit, a guide showed them how to carefully handle a butterfly without hurting it. Everyone was smiling and listening attentively. They even got to see a butterfly emerging from its chrysalis, which was both fascinating and thrilling.

After the tour, the students enjoyed a picnic lunch while watching the butterflies dancing in the air. Some kids started drawing pictures of the butterflies they had seen, while others were playing games and sharing their favorite parts of the trip.

By the end of the day, the students were tired but happy. They thanked the guide before heading back to school, carrying with them wonderful memories of the enchanting butterflies.
