## Jungle Song Adventure

In a distant jungle, a group of friends went on an adventure to find a magical song. They heard that the song was hidden near a strong waterfall.

Along the way, they saw a throng of colorful birds singing a cheerful song. They walked for a long time until they found a long, winding path. On the path, they encountered a snake with a long tongue. The snake told them they were close to the magical song.

They hurried along and soon found a frog singing a song with a gong. The friends knew they had found the magical song and danced along happily.
