

## ANSWERS

**Antarctica** is the southernmost continent, located over the **South Pole**. Though it is covered in snow and ice, Antarctica is classified as a **desert** because it is so dry.

Antarctica is one expanse of ice, and **its** size and shape is always changing. It almost doubles in size every winter when the **sea** freezes along its coast.

No one lives in Antarctica all year round. Vegetation is limited to **mosses**, **lichen**, and algae. The only warm-blooded animal living in Antarctica is the **male** Emperor penguin.
