

Name _____

Science's Shadow

Short Answer Key

1. Victor wanted to create life and unlock the secret of human existence.
2. He was horrified and ran away, leaving the creature alone.
3. Cloning, artificial intelligence, and robotics are similar because they raise questions about responsibility and control.
4. People worry that cloned humans may not have the same rights or be treated fairly.
5. Frankenstein shows that when science is used without responsibility, it can create harm instead of progress.
