

Name _____ **Logical Fallacies**

Logical Fallacies

False Dichotomy

A logical fallacy is an illogical or misleading argument. One type of logical fallacy, called false dichotomy, means limiting options to two when they are actually many options. The purpose of this logical fallacy is to mislead audiences into thinking only two options exist in order to influence their opinions and decisions.

DIRECTIONS: Read or listen to the assigned text. Identify the false dichotomy. How do you know it is a false dichotomy? What other potential options or choices exist?

Next of Text: _____

False dichotomy argument: _____

Why is it a false dichotomy? _____

What are some other possible options?
