

Name _____

What Does an Aardvark Look Like?

Short Answer Key

1. An aardvark's ears are large and upright, like a rabbit's.
2. Aardvarks use their claws to dig burrows and break into termite mounds.
3. The main food of an aardvark is termites and ants.
4. Aardvarks dig burrows to sleep in during the day and to protect themselves from predators.
5. An aardvark's tongue is long and sticky, making it perfect for catching termites and ants.
