

Name _____

What Does an Aardvark Eat?

Short Answer Key

1. An aardvark's favorite food is termites and ants.
2. An aardvark uses its sharp and strong claws to dig into termite mounds.
3. An aardvark's tongue is long and sticky, which helps it scoop up termites and ants quickly.
4. Aardvarks are called "earth pigs" because they dig into the ground and eat insects from the soil.
5. Aardvarks help protect plants and trees by eating termites and ants that might harm them.
