## How Does an Aardvark Communicate?

### Short Answer Key

1. Aardvarks primarily communicate through scent marking.
2. Male aardvarks use scent marking to attract females and signal their presence.
3. Aardvarks may grunt or make soft noises when threatened or interacting with their young.
4. Physical gestures include nudging their young or raising their back when threatened.
5. It is important for bonding and ensuring the cub stays safe while learning survival skills.
