

Name _____

All About Llamas

Open-Ended Response Answer Key

1. Llamas are important in South America because they help carry loads, provide wool, and protect livestock.
2. To care for a llama, you would need to provide food like hay, clean water, shelter, and companionship.
3. Llamas are different from other animals because they can spit, hum to communicate, and carry heavy loads in the mountains.
4. Llamas are used in petting zoos and therapy because they are friendly, calm, and gentle with people.
