

Name _____

The Inventor's Aerial Adventure

Short Answer Key

1. Oliver's flying machine was a sleek contraption with wings made of polished wood and humming gears.
2. Highlights of the aerial adventure included soaring above the town, gliding over treetops, swooping through valleys, and witnessing wildlife below.
3. The friends reacted with excitement and felt exhilarated while soaring through the skies, taking in the breathtaking views.
4. The sunset marked the end of their adventure, signaling the return to the open field.
5. Oliver's invention brought his friends closer to their dreams by allowing them to experience the world from an aerial perspective, something they had always admired.
