

Name _____

Unlocking the Mystery of Alcohol Addiction

Short Answer Key

1. One environmental factor that can contribute to alcohol addiction is growing up in an environment where alcohol misuse is common.
2. Alcohol addiction can worsen mental health issues, such as depression and anxiety, and may lead to the development of additional mental health disorders.
3. One consequence of alcohol addiction related to work or education is that maintaining employment or academic performance becomes challenging, often resulting in job loss or academic struggles.
4. Potential legal issues that can arise due to alcohol addiction include DUI (driving under the influence) charges and public intoxication arrests.
5. Withdrawal symptoms are physical and psychological symptoms that occur when someone with alcohol addiction tries to quit drinking. They occur because the body has become dependent on alcohol, and removing it leads to discomfort and distress.
