

Name _____

All About Capybaras

Short Answer Key

1. Capybaras spend a lot of time in the water to cool off, escape predators, and find food.
2. They use their sharp teeth to chew tough plants and bark.
3. Capybaras warn their group about danger by making sounds like barks and whistles.
4. Two predators of the capybara are jaguars and caimans.
5. Capybaras are considered social animals because they live in large groups and communicate with each other.
