## All About Rabbits

### Open-Ended Response Answer Key

1. Rabbits are good at escaping predators because they have long ears to hear danger and strong legs to hop quickly.
2. Rabbits communicate by thumping their back feet, using body language, and sometimes making soft noises.
3. Wild rabbits live in burrows and must avoid predators, while pet rabbits are cared for by humans and have safe homes.
4. Rabbits make good pets because they are gentle, quiet, and enjoy spending time with people.
