## Alpacas' Daily Habits and Behaviors

### Short Answer Key

1. Diurnal means they are active during the day and rest at night.
2. Alpacas feel safer in groups because they can communicate and share resources.
3. They express feelings by humming and using body language.
4. They graze during the day because they are diurnal and plants are more available.
5. Alpacas need grass, clean water, space to roam, and shelter.
