

Name _____

The Life Cycle of an Alpaca

Short Answer Key

1. An alpaca typically lives 15 to 20 years.
2. Alpacas primarily eat grass and hay.
3. Alpacas stay in herds for safety and social interaction.
4. The cria stage is when a baby alpaca relies on its mother for milk and protection.
5. Alpaca fleece is soft and warm, making it ideal for clothing.
