## The Amazing Space Adventure

Once upon a time, in a small town, there was a group of friends named Lily, Max, and Sam. They loved looking at the stars at night. One

clear evening, they decided to have an amazing space adventure.

They grabbed their cardboard boxes and turned them into spaceships. With colorful markers, they drew buttons, lights, and even a pretend rocket engine. They put on their astronaut helmets (made from old bike helmets), and their adventure began.
