

Name _____

Amphibian Diversity: Exploring the Many Species of Frogs, Toads, and Salamanders

Open-Ended Response Questions

1. Describe the differences in appearance between frogs and toads.
2. How might the adaptations of salamanders reflect their habitat preferences?
3. Can you think of any reasons why caecilians are less well-known than frogs and salamanders?
4. Explain why amphibians are considered both predators and prey in their ecosystems.
