Name _____

Antigens and Antibodies: Partners in Immune Defense

Open-Ended Response Questions

1. How might the body respond differently to an antigen it has encountered before compared to a new antigen?

2. Why is it important for antibodies to be able to recognize specific antigens?

3. Can you think of any real-life examples of how antigens and antibodies work together to protect the body?

4. What might happen if the body couldn't produce antibodies?
