

Name _____

What Are Ants' Daily Habits and Behaviors?

Open-Ended Response Answer Key

1. Ants' habits, such as teamwork, communication, and foraging, ensure the colony has food and protection, helping it survive and thrive.
2. Communication is important because it helps ants warn about danger, share food locations, and coordinate tasks. They use pheromones and antennae to achieve this.
3. (Example Response) As a worker ant, I would spend my day searching for food, laying down pheromone trails, and helping to maintain the nest.
4. (Example Response) Ants are similar to humans because they live in organized groups, communicate with each other, and divide tasks to keep their community functioning.
