## Icy Adventures: Life as an Arctic Explorer

### Short Answer Key

1. Arctic explorers stay warm by wearing insulated clothing, warm hats, and gloves.
2. The Northern Lights are colorful lights in the sky caused by solar particles. They are special because they create a magical display.
3. It is important to be respectful to avoid disturbing the animals and to study them in their natural habitat safely.
4. Arctic explorers often live in tents or ice houses and melt ice for drinking water. They cook warm meals on portable stoves.
5. (Answers will vary) Children can share their thoughts on what they find most exciting about the life of an Arctic explorer.
