

Name _____

How Does an Armadillo Communicate?

Short Answer Key

1. Armadillos use scent to mark territory and attract mates.
2. Curling into a ball helps protect the armadillo from predators.
3. Armadillos can grunt, squeak, or make low-pitched noises when scared.
4. Baby armadillos learn by observing their mother's actions, like finding food and staying safe.
5. Body language helps armadillos signal danger and protect themselves.
