

Name _____

Life as an Assembly Line Worker: Building the Future Piece by Piece

Short Answer Key

1. Attention to detail, manual dexterity, teamwork, and physical stamina.
2. The morning meeting is where workers receive instructions, goals, and discuss safety protocols for the day.
3. Quality control ensures that each product is made correctly and is of high quality, preventing defects.
4. Workers get short breaks to rest and recharge during their shift.
5. Task rotation helps prevent monotony and reduces strain from repetitive movements.
